By Contributor Updated July 21, 2017 MP3 Rocket is one of several music/video downloading services that takes advantage of the Gnutella Network, which allows users to share their files with others via the Internet. Similar to Limewire, the program is very easy to use and gives you unlimited free access to millions of music and video files. Download and install the software from the MP3 Rocket website, but be careful. The basic version of the program is free, but you can pay up to \$34 for a "pro" version if you want more than the basic ability to download and share files. Choose the type of file you'd like to download by clicking on one of the icons in the left panel or select "All Types." Enter the file name of the file you want to find in the box in the left panel, and click on "search" or select one of the categories from the toolbar across the top, which will give you access to the more popular music files. Select the genre of music you want from the list in the left panel and names of artists and songs will appear in the right panel. Double click on the file, if you have the following connections it may take a while to download: Dialup (56k) 8 m 38 s, ISDN (128k) 3 m 46 s, DSL (512k) 56 s, Cable (1024k) 28 s, T1 (1484k) 19 s. Do not click on "Continue" on the MP3 Rocket home page if you want the free version of the software. Clicking on "Continue" brings you to a page to sign up for the Pro version, which can cost you up to \$35. To get the free version, click on the word "download" at the bottom of the page. Beware of copyrighted or licensed files that may be available on the network. Since it's a file-sharing service, there may be many of these listed. Downloading them without paying for them is illegal. Check the MP3 Rocket website for tips on how to recognize these files. The GoGear line of portable MP3 players by Philips includes an array of models with various features and storage capacities. Philips employs its proprietary "Songbird" software for ease of music download and management from files on your computer, and you may also download entire music libraries from iTunes. If your Songbird software does not operate properly, has not been installed or if you are using an older GoGear model without software, you may use the "drag and drop" method to download MP3 music files. Install the Philips Songbird software by inserting the CD and following the installation instructions on your computer. Plug your Philips GoGear MP3 player into your computer with the supplied USB cable. The GoGear player will turn on automatically and launch the Songbird Software. If the software does not launch when the player is plugged in, click the Songbird icon on your computer's desktop or locate it within your program menu. Click "File" located on the Songbird toolbar, and click "Import Media," which will open a search window on your computer. Locate the MP3 file you wish to import, click to highlight and click "Okay." The MP3 files will now upload to your GoGear player. Click "Tools" followed by "Options" from the Songbird toolbar at the top of your software screen. Click on the tab labeled "Media Importer" tab, followed by a click on the "iTunes Import/Export." This allows you to choose your iTunes library and list available options. Click on "Import Library" when you have made your selection and options. Your iTunes library will be imported into the Songbird software. Click on individual music files or groups within your Songbird library and hit "Okay" for transfer to your GoGear player. Plug the GoGear player into your computer with a USB cable. The player will turn on automatically and your computer will load the drivers and recognize the device as an external drive. Click the "My Computer" icon on your desktop or in your "Start" menu and click on the Philips GoGear device icon. This will open the GoGear file folder and display files within the player. Note that in some instances with older operating systems the player may appear as "USB Mass Storage Device." Locate the MP3 files on your computer that you wish to download to the player. Click on the desired files while holding the mouse button, drag the files to the GoGear folder and release the mouse button. Your files will begin copying to the player and be ready to listen to when the process is completed. 7digital - new and improved Android app lands 7digital has announced a massive revamp of its Android app, which allows MP3 downloading straight from the application. The news comes on the same day that Spotify announced that it would be allowing iPod integration into the service and the ability to wirelessly sync your MP3 playlists in Spotify from your computer to your phone. Major update 7digital has been working on its new app for some time. Earlier in the month, TechRadar exclusively spoke to Ben Drury CEO of 7digital, who said about the then upcoming update: "It is similar to what you get on the PlayBook and the Galaxy Tab but it is not tied to any product. It offers a nice purchase experience. It is an integrated store, offering access to your music library in the cloud. The original app doesn't have any of this so it is a major, major update." It has a really nice player, one-click purchasing and some nice features that people love like LastFM scrobbling and the stream quality changes depending on your Wi-Fi signal. The 7digital Android application is free to download directly from the Android Market, GetJar and the Amazon Appstore. Look out for our Ben Drury interview tomorrow. Part of Brit Week, he tells us how it is creating a technology business in the UK today. By Nick Davis A MP3 file is a compressed digital music file. MP3 files generally are available on the Internet for downloading to your computer or transferring to an audio player like an iPod or other music device. Downloading and saving an MP3 file to your computer takes just a few steps. Visit one of many websites that sell MP3 files--Amazon.com, Walmart.com, iTunes.com, Napster.com and MP3Download.net are a few big ones. Most of them require you to register a user account. Most sites charge a fee for downloading MP3 files. Typically, a membership allows you to download a certain number of MP3 files each month. Files can be purchased with a credit card or gift card. MP3 files generally are intended for personal, non-commercial use. You are allowed to burn the files to a compact disc, play them on your computer or transfer them to your MP3 player. But you are not allowed to copy them for friends or use them for a commercial purpose. To download an MP3 file to your PC, right-click on the Download option of the MP3 file and select "Save Target As" if you are using Internet Explorer or "Save Link As" if you are using Firefox. Next, navigate to the directory where you want the file to be saved. Once the download is complete, you can open the file to play it or transfer it to your MP3 player. To play your downloaded MP3 file, open it in Windows Media Player, Real Player or any other music player. To download an MP3 file to your Macintosh computer, control-click on the "Download" option of the MP3 file and select "Save this link as." Select the directory where you want the file to be saved. Once the file is downloaded, open the MP3 file in your favorite music player or transfer it to your iPod or other MP3 player.
