This edition has sixteen additional pages of clinical images, including CT and MRI, which students can compare with cross-section anatomical photographs. Many images have been electronically improved or recanted for better contrasts. Page 2 This Atlas presents exceptional photographs of all-colored dissections of real corpses, with schematic drawings and diagnostic images accompanying it. The photographs represent anatomical structures more realistic than the illustrations in traditional atlas and show students exactly what they will see in the dissection laboratory. The chapters are organized by region in order of typical dissection. Each chapter presents structures both in a systemic way from deep to surface and regionally.
